

DUVÁN ALBERTO MARTÍNEZ PARRA

Systems Engineer - Software Developer

Bucaramanga, Santander, Colombia | 324 685 3552 | duvanmar1098@gmail.com

PROFESSIONAL PROFILE

Honest, responsible, and receptive professional with high personal standards and a strong orientation toward results. Passionate about software development, with significant experience in technologies such as C#, Java, ASP.NET, MVC.NET, Entity Framework, PHP, and JavaScript. Capable of designing, implementing, and maintaining scalable technological solutions with a proactive mindset and a permanent commitment to continuous learning.

TECHNICAL SKILLS

- **Languages:** C#, Java, PHP, JavaScript, Visual Basic .NET.
- **Web Technologies:** ASP.NET, MVC.NET, HTML, CSS, Bootstrap, jQuery.
- **Databases:** SQL Server, PostgreSQL, Azure SQL, DynamoDB.
- **ORM & Reporting:** Entity Framework, Crystal Reports.
- **Cloud & DevOps:** AWS (ECS/EKS, Lambda, API Gateway, S3, RDS, IAM), Docker, Terraform, CI/CD (CodePipeline, GitLab CI).
- **Testing & Best Practices:** Version control, unit testing, log management, and monitoring.

WORK EXPERIENCE

Fundación de la Mujer (August 2021 – Present)

Role: Programmer - Analyst Developer

Technologies: C#, MVC.NET, SQL Server, Bootstrap, HTML, CSS, JavaScript, Windows Services, Web Services, Topaz.

- Development and maintenance of enterprise applications.
- Design and implementation of solutions based on microservices and deployment on AWS, including Docker containers, orchestration, and CI/CD pipelines.

EO Datos y Documentos (November 2020 – August 2021)

Role: Senior Developer

Technologies: C#, PostgreSQL, ASP.NET, MVC.NET, Entity Framework, Crystal Reports.

- Technical leadership in migrations and optimization of web applications.
- Integration with external services and generation of complex reports.

SOLINT Soluciones Integradas S.A.S. (January 2014 – November 2020)

Role: Programmer - Software Developer

Technologies: Visual Basic.NET, SQL Server, ASP.NET, PHP, HTML, CSS, Azure.

- Participation in custom software projects.
- System maintenance and technical support.

CLOUD COMPUTING & AWS EXPERTISE

Extensive experience in designing, deploying, and operating microservices in AWS, applying Infrastructure as Code (IaC) and automated pipelines. Key services and patterns managed:

- **Containerization:** Docker and orchestration in Amazon EKS (Kubernetes) and Amazon ECS.
- **Serverless:** AWS Lambda functions and API Gateway for lightweight endpoints.
- **CI/CD:** GitLab CI / AWS CodePipeline + CodeBuild for automated deployments.
- **Infrastructure as Code:** Terraform and CloudFormation for reproducible provisioning.
- **Networking & Security:** VPC, Security Groups, IAM (principle of least privilege).
- **Databases:** S3, RDS (PostgreSQL/SQL Server), DynamoDB.
- **Observability:** CloudWatch (logs, metrics), AWS X-Ray, and dashboard monitoring.
- **Deployment Strategies:** Blue/green, canary releases, autoscaling, and recovery policies.
- **Load Balancing:** Application Load Balancer and integration with Route 53.
- **Security Best Practices:** Secrets management (AWS Secrets Manager/SSM Parameter Store).

RELEVANT PROJECTS

- **Monolith to Microservices Migration:** Designed the CI/CD pipeline, containerized .NET services, and deployed on EKS, reducing deployment time by 60%.
- **Serverless Implementation:** Developed Lambda functions for asynchronous processing, reducing costs in low-utilization workloads.
